

	1	2	3	4	5	
1	(1, 1)	(1, 2)	(1, 3)	(1, 4)	(1, 5)	(1, 6)
2	(2, 1)	(2, 2)	(2, 3)	(2, 4)	(2, 5)	(2, 6)
3	(3, 1)	(3, 2)	(3, 3)	(3, 4)	(3, 5)	(3, 6)
4	(4, 1)	(4, 2)	(4, 3)	(4, 4)	(4, 5)	(4, 6)
5	(5, 1)	(5, 2)	(5, 3)	(5, 4)	(5, 5)	(5, 6)
6	(6, 1)	(6, 2)	(6, 3)	(6, 4)	(6, 5)	(6, 6)

1. What is the probability to find sum of 3 & 5 from two dices?
2. What is the probability to find sum of 7 from two dices?
3. In a single throw of 2 dice, find out the probability of getting of 12?
4. In a single throw of 2 dice, find out the probability of getting of 11?
5. In a single throw of 2 dice, find out the probability of getting of doublet?
- 6.

1 dice = 6 {1,2,3,4,5,6}

2 dice = $6^2 = 36$

3 dice = 6^3

.
